Acc. 1992-054-01

Wounded in heart burn
 let this lie until you get
 it earned. And all the rest
 by the grace of God I am bound
 to swear

I have been in
 the same place
 for many years
 and I have seen
 many things
 which I cannot
 describe to you
 but I will tell
 you of the most
 remarkable
 thing I have seen
 since I came to
 this place
 It was on the
 1st of May
 when I was
 out on a walk
 and I saw a
 very large
 tree which
 had been cut
 down and
 was lying on
 the ground
 and I saw
 many other
 things which
 I cannot
 describe to you
 but I will tell
 you of the most
 remarkable
 thing I have seen
 since I came to
 this place

Could I not pour
a small quantity of water

Does Alcohol enter
the blood. It does enter
the blood — It produces
congestion of the brain —
It gets into the brain through
the blood — It is the source
of the Alcohol that produces
the effect.

Alcohol is an antidote
for the poisons of Arsenic
and Acetic acid — It is
also an antidote for the
poison of the Opium —
It is to those that are
in the habit of using it —
Orion for to extract the
juice of Achillea Mastic
two or three and apply
them to the abdomen
in the form of a pottice

Gordick

Put the Gordick
into a paper and apply
it to the place for
a child a piece as
long as the string two
or three times a day

Si Deafness

Take a Gordick

and heat it - and
wrap it in a rag
and put it in the
ear and leave it
in all night

For sting of a bee take
a Gordick or Onion
and apply to the hurt
sting.

2. *Syphilis* Dec 7 169 163

Syphilis

It is a dark brown color
it is an ~~arrested~~ better

Skull Dec 7 169 163

Dec 7 169 163

Dec 7 169 163

Gross

Syphilis *Syphilis* or

Syphilis —

Usually find copper colored
spots on the skin the child
long shinned appearance

If the woman is tainted

give the woman Iodid of
Potassium & Alod of mercury

Civilisation Eradicate

the disease by Inoculation

Inoculate the thigh with
161

Matter from a Shanker
But, don't do it for your
patient may take you for
Damage — — Gross —

Wounds

It may be made by almost
anything, - Insized wound.
How must such a wound be
managed 1st Su to the Hem-
orrhage - Then remove all
the foren matter or foren
Substance - If there is any
hair it must be removed
Dressing - Adhesive plaster
and Sutures - Compresses and
bandages. The plaster should
be cut in direction of its length

Dec. 30 1853

Apply the 1st Strip across
the center of the wound—
leave places for drainage—
leave the Strips on until
they become painful— Two
or three days—

// Colloids— It may be
applied in wounds of the
neck or where there is a great
dilatation of the skin

the distention of the bladder
 pain in motion - very little disch-
 arge Swelling - nausea - great
 nausea - pain without motion
 Increased pain with motion
 quick pulse coated tongue
 loss of appetite distress about
 the menses -

Treatment abundant appli-
 cation of leeches upon the
 perineum & above the pubis
 Dover's powder & Calomel -
 Sedlitz powder - Epsom Salts -
 use S'adamum Injections
 after the Cathartics - if there
 be much dryness pass a
 little lard into the vagina

{Acute}
{Chronic} M. trachitis 1863

Give the patient - very
light Diet - Keep her
perfectly still until she
is all right

Still uneasy aching pain
in the epigastrium -

You will sometimes feel the
uterus enlarged through
the Abdomen - retroversion
of the uterus sometimes
that the rectum have some
drawing upon the Bladder
pus & mucus secreted and
Blood thrown out
with a pail salid looking
face dyspnoea from
the disorder

1287

Hospital Clinic Saturday Dec. 4 -
1st Case - Anurism of Artery -
Death from Convulsions
or from bursting of the
Anurism - Treatment -

(Sugar of lead) Take a little Blood -
Digitalis Veratrum Virida. All
that you can do is to make you
patient comfortable - perfect rest -
to the patient -

Case 2nd Dullness over the right
lung - Generally catch a bad
cold - (Pneumonia) - Rusty colored
^{cannot lay on the side}
Expectoration - Treatment -

Counter Irritation Cupping
Mucronals & Antimonials
Weak Diet perfect rest -

Apply over the chest turpentine
all over the Chest Blisters
if the patient is pale wine whey
but feel your way - In the first
place overcome the inflammation
Dulness upon percussion — — —

Surgical Clinic Dec. 4th 1863

1st Case - Inflammation of the bones
and dead Bone - Necrosis of the
femur - make a free incision
dress with warm water

2nd Case - Dislocation of the
of the Shoulder - Replace it by
putting the heel in the axilla
and take hold of the arm and
draw it in and then secure
it with bandage

158

3rd Case - Fistula in ano

The patient sometimes has a
cough The Bowls are loosed
up for 3 or 4 days

Pass a director up the sinus
and take a bistoury and
cut the Sphincter up
the director and apply Caustic
potash

4th Case - Compound fracture
of the Fibula and Tibia and
wound - Place it in the
bran dressing - Take a
fracture Box take some
muslin into it to keep the bran
in - Remove the Bran that
has run in it every day
and put in fresh - use
Wheat Bran

Wallace Dec. 4th 1862

Lime water & oil for itching
of the vulva —

Coal Sperm water hae. weak Boile-

Treatment Evacuate the bowels

Camphor 10 or 15 grs, every
day - Camphor had above
the pulvis and one on the
opposit with an ounce

Gross-Clunie Dec. 4th
Apply the structure of
Iodine on the surface
absolute rest

Very pretty girl
young - with girl

I saw a menstruating
uterus today - Dec. 5th 1863

Dec. 7th 1863 Monday
Dickson - Typhoid Fever
It belongs to a very large
group of diseases -
ulceration of the intestine
is a very prominent
symptom - The symptoms
are very clearly 1863

incoercible - sense of
 Sanguor and depression
 is one of the symptoms
Chilliness which will
 last perhaps a whole
 day - Nausea - The Tongue
 is swollen furrowed
thinly towards the End
 Thick at the Root
 The skin of the Head tight
tight - The patient is
 anxious to go home. Pulse
pulse is somewhat smaller
 and quicker - In some corded
 sometimes an Intermission
 Hand feet and nose cool
 irregularity of the Heat

(Dickson) (continued)

on the surface of the body.
This is the condition of
find the patient the 1st
week - disturbance of
the bowels - distention of
the stomach - Diarrhea
At the end of the 1st week
or beginning of the 2d you
will see red spots on
the surface - you can
obliterate these spots -
They disappear very soon others
come - Patients may die without
the spots - Negroes never have
the spots I was week 2, you
have the signal more
Hutchinsy edited

you may have hemorrhage
from the nose The Tongue
dry - Sordes around the
teeth dent matter -

you will find it around
the lips and edge of the
tongue - The patient is
restless talking and
muttering to himself some-
times dull and heavy -

The Bowels become more and
more irritated by discharges
Submucous matter in the upper
portion of the Intestine -

Air tumors in different parts
of the body - a particular spot
in the belly becomes painful

(Diarrhoea Continued)

Diarrhoea is the usual mode
of Death - He may die
from Exhaustion - or coma

The Stomach is almost always
disturbed - The gland or implant
The glands of Liver are swelled
and, inflamed ulcerated
ulceration of the mucous
membrane of the Stomach the

Gross - Surgery
(Dressing Wounds -)

Dressing by Suture

The interrupted Suture you
should be careful that it
is not too large - The Suture
should be well washed
The needle should be

-F&F

curved can should be taken
 that the needles not go
 through any blood vessel or
 nerve or muscle - tie the
 artery until they are all
 in and then tie the middle one
 first - tie them gently but
 firmly - Then take adhesive
 plaster and apply it over the cut
 to keep it from gaping let
 them remain as long as neces-
 sary - to or 3 days or more -
 When ever you can use the Iron
 use it it is better than silk
 or cotton irritate the parts -
 Twisted or hair line suture
 In making the twisted

Suture take the pin and
pass it through the part
and then take a thread
and pass it and pass
it elliptically and then
in order to support
the interval pass the suture
from one to the other
Then cut off the ends of
the pins - constitutes a
very nice dressing - take
out the first pin at
the end of 36 hours
the next at the end
of 24 hours after - they
may be left 3 or 4
days

1871

The quill suture is
seldom employed in
the present day -

In deep wounds we must
apply compresses on the
opposite side held there
by a roller to mass it
back from the bottom
place the parts at rest
and if possible in an
elevated position and in
a relaxed position.

Little or no local treatment
is necessary. ~~If over action~~
regulate the Diet avoid
action for ^{several} ~~many~~ days
of Union in the present

1 by direct ^{union} adhesion

2 Union by the 1st
intention slight
inflammation place

Pericardial Apertures
 Most of the muscles at
 level of the third order
 Deltoid Muscle. Articular
 muscles are 4 in number
 subscapular M - inside of
 Scapula insert on the
 tuberosity of the humerus

Wallace Dec. 7th 1868.
Subject - Inflammation of
the neck of the Uterus
In health it is smooth
a peculiar gray pulsing
nor is it painful to
the touch - Now when
diseased - The length
is greater width is greater
and thicker - It is a
very common disease
arrest of the menses
Parturition - Sometimes
at cessation of Menstrua-
tion we have Inflam-
ation we have a list
of, Causes

1891

By 129 times ~~Amputation~~ ^{Amputation}

Enlargement of the
Tissue - you will find
the neck of the uterus
hard filled more or
less with lymph. Some
displacement of the womb
the woman call it falling
of the womb. What

Does the uterine neck
look & feel when infla-
med - It looks very
red - secretions the
lymph and mucus or
mucopuss - It annoys
the woman - after wiping
away the puss you will
find little stringy flakes

Thrown off time after
time first symptoms
that the ulcer is large
then usual sometimes the
vagina will be inflamed
take a sound and pass it
into the neck and if you
get blood this is inflammation
under discharge of Starchy
Matter mas The ulceration
generally begins right at
the orifice of the uterus
generally both lips but
not equally - the moment
the probe touches the ulcer
you will have a white color
These Ulcers do not often
crack - In addition
you will find the

vains enlarged - what
discharges have you in
an ulcerated uterus -
but when there is formal
ulceration is beginning
The discharges in ulceration
is purulent
If the woman tells you
that at every sexual
intercourse she has bleed-
ing - it is nothing but
ulceration of the uterus
Sometimes there is
much bleeding - wipe it
away and touch it
with caustic and as
soon as you get it touched
all over the bleeding
will stop

Dunblison Dec. 7th 1863.

Reception of fresh matter

The circulation was
discovered by Harvey
in 1619. We have two
kinds an Arterial and
~~a~~ Venis all the blood
goes to the Lungs to be
converted in to Arterial
blood and then passes
back to the heart and
passes out of the Aorta
to every part of the
system. The blood passes
into the coronary artery
during the contraction
of the right side (50%)

of the heart

Both sides of the heart
act together. They contract
together when

of anastomosis

Tying the Subclavian
artery above the chest
than you work

around the artery

the pulsation stops

Sometimes - If you

want to tie the

the artery near the

heart is the Sclerous

muscle and cut down

below. But it is a

very dangerous

operation as it gets

near the heart

The heart syn-
chises greatly with
the arteries about the
neck when you can
avoid it dont tie it
Cut down to the artery
above the clavicle and
compress it with the
thumb and finger and
then cut in the axilla
and let out the clot
and tie both ends of
the artery then —

Dr. Ellison Dec.

35

Treatment of Typhoid Fever

Exceptions in fevers are some-
times wanting - was struck with
the Lesson - Cause -

This whole group of disease
occur together yet there is
a difference - Typhus and Typhoid
occur together - How are these
fevers taken I think they are
catching - filth carries with it
Typhus fever - the coming together
of the crew of a vessel that have
been confined for a long time
they are capable of giving
fever - I believe that Typhoid
fever is contagious

1691

Frost

At what period does a
Shoulder obtain its hard
base - in 8 days - The bones
may remain - to get rid
of this put the patient
under mercury - apply
acid nitrate of mercury
or mercurial ointment
Get rid of the poison by
a mild mercurial treatment
Bubo - is an affection of
the Lymphatic Glands

There are several modes
by which wounds may heal
1 by the first intention

By granulation —

By a Secondary adhesion
a wound cannot heal
without inflammation and
plastic matter

Incised wounds Poisoned
wounds — They are inflicted
with a nail or anything
of that kind — It may
extend to any depth — They
are very painful — Seldom
attended with any hemor-
rhage — It is liable to be followed
by Erysipelas — There is no
disposition to heal by
the first intention —
Secondary affection —
the parts are liable to
contraction

(Gross Continued)

How should such
a case be treated -
Get rid of the foreign
substance in the first
place cut down upon the
foreign substance and
remove it with your
forceps - Allay the pain
with Anæsthetic - apply
externally cloths wrung
out of warm water
medicated with opii
Make free Incisions for
the purpose of allaying
distention -

Support the
system with Anæsthetics

never allow Tetanus
 to appear - Wounds
 are sometimes lacerated
 torn - a lacerated wound
 seldom bleeds much -
 It liable to be followed
 by secondary hemorrhage
 There is a sense of numbness
 If a nerve be torn there
 is but very little pain
 When ever the patient
 is in a violent shock
 the blood coagulates
 much sooner the muscu-
 lar system is paralysed
 and does not act on
 the blood vessels

Treatment of the Lacerated
wound - Do the best you
can for it. Join of the
parts as nicely as possible
and tie the arteries and
bring the parts together
the same as Incised
wound - Tepid water
Dressing, medicated
by Op^{li} - Wounds are
sometimes Contused
bones may be crushed
Arteries torn and no
break of the skin -
What shall you do in such a case -
Treatment Stimulat this mean
hold ammonia near the nose
dash cold water on (4-5)
stimulating Injection

The patient lay the head
a little lower than the other
parts to throw a little blood
to the brain. —

#Black eye Cold water
containing a little salt or
vinegar or arnica—
let out the fluid

Dunblison Dec. 8th 1863

Circulation - Contraction

Pulmonic Heart systolic

heart ~~the~~ heart contracts

both sides of the heart
contract at once - There

are two sounds to the heart

The blood passes out of

the heart into the pulmi-

nary artery - The sound

is rendered by the contra-

ction of the tissues and

apertures

sounds of the
heart

Endocardial

Blow-
ing

{ Bellows

loosid of Iron - wine
of Ergot - Myrrorica
Monsel Salt 23

20xides water

Inject the uterus with
Monsel Salt 23 take
a female Syringe
What must

B. 51

Let perfect rest
 Cures over the chest
 Cream of tartar in
 small doses - Tea of
 unana. Congestion
 of the Kidney which
 produces Albumuria.
 Local Case - Neuralgia
 what is the cause of it
 there are a great many causes
 The best remedy is Iodid
 of Potash when it comes from
 Cerebral taint. It is inflamed
 of a nerve - Cured by leeches
 blisters dressing it with morphia
 Small blisters - more or less
 irritation all the way down
 the spine - Let perfect rest
 Croton cast oil

Suppose Amphetamine
Give a hundred and fifty
pills made of brown till
they get to come back
until they have let an
the whole - 1 gr. if brown
in each pill - sometimes
patients do well with
opium

Bella. donna
Aconite

Sometimes you can't
make any impression
Sometimes it does to
take out a piece of
the nerve

Inflammation of the uterus
Hypertrophy of the uterus
The cervix uteri - How
much may a uterus be
enlarged it may be from
2 to 5 times its natural
size When you commence
treating it you will find
it grows larger - Some
times singularly hard
and thick sometimes
you will have one up longer
than the other on the ¹⁸⁷¹ account

of one side being diseased
and not the other - There
is change of Position
It will press against
the rectum and produce
Inflammation of the rectum
Falling down of the
uterus is a very troublesome
thing - if the uterus is healed
they then will be no trouble
The upper part of the
vagina will sometimes
be present let it alone
cure the uterus - Sometimes
the vulva is affected
from the uterus - Cure
the uterus and that
will get well taking
of the vulva is a cure

of Inflammation of the
 Uterus - for that use
 lime water and oil
 Touch the os uteri with
 Lassar's ointment every 4-5 or
 6 days perhaps for a month
 Sometimes the rectum may
 become involved discharge
 of pus and blood - Pain
 is rarely felt at the
 seat of the disease
 Sometimes the uterus
 will be very sensitive
 and sometimes not
 The point will be
 in the small of the
 back and in the (681)

138 left overy it may
 be in both Ovary
 Pain in the Hypogastric
 region Pain in
 the Hip Pain under
 the ribs Pain high up

12 Philadelphia Dec #
Typhoid fever #
Dickson Dec 10th 1863

Examine your patients
carefully - No fever can be
ever short - In a mild case
give an emetic and cathartic
use ipecacuanha for Emetic
Give a mercurial Cathartic and
Castor oil after it - Examine the
abdomen and if you find tenderness
apply a few leeches early in the disease
Quinine in Tifoid fever after the
Stomach has been cleared out by
a Cathartic and emetic
If you find Quinia not
well borne your patient
will bear Chinastemma
with Spirits of Nitre (L&L)

for the Diarrhea use Tannin
warm application to the
belly continually. —

Examine the condition
of the bladder — use the acids
continually

Mineral Salts Hydrate-Carbonate
mild Salines — Mineral acids
Continuous nourishment
Hydrochloric-acid 20 drops
every two hours by tea

Febrile fevers ulceration of
the Intestines comes by
starvation Don't carry the
nourishment too far — Turpentine
is good in a red dry
tongue — Veratrum viride

Dickson Continued
Dec. 14th Monday 1869
after a cathartic
An emetic will relieve the
diarrhoea Antimonial or ipecac
can be used - I would rather take
my chance without purgatives
Select out of all the methods
the best for the case you are
treating - abstract light from
the patient - Mild cathartic
mercurial Cathartic & Emetic
ipecac Hydrochloric acid
If the pulse is above one
hundred give the Antimonial
Emetic - Keep the head cool
Veratrum viride - control
the heart's action - bring below
Continuous nutrition - 1861

and Stimulents but don't
 press them to far - Cincona
 infusion of bark - Wine
 ulceration of the epiglottis
 be scrupful to watch stuffing of
 parts bed sores - Change the patients
 beds every day change
 rooms if you can if sores do
 occur apply plasters

Hæmorrhag is a very trouble
 some symptom - draw a few ounces
 of blood cold bath is very good
 cold application to the head
 plug up the nostrils stop it
 if you can - Typhus & Typhoid
 fevers occur together in

the same place and at
 the same time - we call one
 the 14 day and the other the
 21 day fever (H.E.)

Given Dec. 10th

Removed a piece of Bone from
the nose of a boy that he
had slipped in - Cheston bone
Pierced. 6 wounds
Caused by the sting of
insects bite of Reptiles
The sting of bees sometimes produce
death The constitutional symptoms
are depression feeling of faintness
Treatment - alcohol Camphor
Whisky Should Constitutional
all symptoms occur give
Alcoholic stimulents Salt and
water - Treatment of Snake
Bites Sustain the patients
System by alcohol and (E&E)

Carbonate of ammonia
Give it freely - Locally
at once cauterise the part
cut it out very freely
let the wound be sucked
Apply a ligature above
Inject the Tincture of
Iodine - If Suppuration
occurs make free incision - Hydrophobia
persons of all ages are sub-
ject to it. The disease generally
becomes active at about
25 days to 9 months or
more - In the dog it is
less. The poison exists
in the saliva of the rabid
animal

Great dread of water or
any fluid it excites
spasms of Glottis
Treatment 1st Effort
free incision and
apply cups and Actual
Counter - Glanders -
It comes from horses -
Murrain - It is propagated
to the human being - it
is blood disease - Treat it
as snake bite -

Dedecating poison
bad symptoms every one
within 12 - 18 - 24 hours
generally in a red spot
and streaks of red (18/

running up towards the
Shoulder - Treatment

Wash the part very thorow-
ly and Snock the part
after you have Snocked
the part let the water
run on it again and
then apply Cold Nitrate
of mercury or Strong
Solution of Alum

In making a post mor-
tem Examination we
should be very careful
oil the hands with lard
or ointment ^{Yellow} Serrate

2 or 3 in 12 periods
one every 3 hours while

exists —

Indigestion the last week
we had a dysentery

and, also a well-

but not only it to

the dysentery or colic

of dysentery

Keep attention of themselves

Wallace Continued

117 117

117 7.

You must ~~at first~~
link around the
Spinalam - and as
soon as you have app-
lied it take a finger
in. I suppose and get
to neutralize the costic
or it will become
Don't apply it hard, very
light very light

The actual costic may
be applied - Don't leave
lunar costic on more
than 4 or 5 seconds

In Simple Inflammation
Tincture of Iodine is
a very good remedy

111

Don't leave costic on

211

81

lent lunas cutis is
the thing - Felling of
the wound.

Gauss Dec 14th Monday
Gunshot wounds -

The pain is very slight but
not always. Hemorrhage
is generally very slight
it may be primary or sec-
ondary a person may perish
by shock - Trainw comes
on by soldiers laying on
the damp ground Erysipelas
is very common - Many
perish from secondary Erysipelas
Many die from pneumonia
Prognosis will vary from
innumerable

Grass court - Monday 19
1869

Many die without reason
on a wound of the lungs
sometimes recover - a wound
of the brain never recover
Treatment 1st allay
Shock 2nd Stop Hemorrhage
3rd Remove bone & form
bones

1st allay Shock This
is done by cordials placed
in the recumbent posture
Cold water to be dashed
upon his face if he can
swallow give him cold
water & Stimulents

Waller Dec 14th Monday 1868

Retroflexion of the uterus —
with the uterus bent backwards
Put the finger up in the rectum
and push up the uterus

Prognosis uteri It is where
it comes out of the body
turning wrong side out —
i.e. the os turns wrong
side out — Strong soreness
of the belly — If it defers
upon the neck you ~~may~~
must cure the inflammation
as fast as possible Give an
injection to clean out the
bowel 2 or 3 cold water
injection every day — You
can press it for momentary
relief if there is much pain
Inject ~~several~~ ~~times~~

Wells continued Monday

Take a Tallow candle and
push the uterus up or into
the rectum or take a
cylindrical pessary up in
the vagina and blow
it up - it will sometimes
happen that you cant put
it up. I call retroflexion
the same as retroversion
Put in a pessary in sudden
cases of retroversion
Don't stretch the vagina

#

Dickson Dec. 15th Tuesday
Typhoid fever The patient
is generally taken with
head aches & a vacant
8/11

look - the heat of the
skin - soon becomes hot
 the skin is dry and harsh
 you have a sallow dull
 look. The eye has a glazed
 look. Yellowness mingled
 with redness -
 examine the eye - a
 good many of the cases
 generally begin with some
 use foul mouth not
 much pain but in
 the head - pain in
 the belly - Great fullness
 of pulse in many cases -
 Cutaneous eruption is
 earlier in these cases

Sick On Continued

The tongue undergoes
many changes often cha-
nging off becoming dry.
Old patients will put
the tongue half way
out and take it back
when you ask him to
don't appear to understand
you. Sometimes the
patient shows Nausea
You find Hiccup the
gloried swelling-pick-
ing at objects in the
air is a sign of death.
Sometimes the urine will
stop you must examine
the bladder—111/868

As a rule we can't
 find any change in
 the system after death.
 by examination — ^{Inspection} generally
 the brain is diseased
 or the heart — The stomach
 is sometimes found
 slightly disordered.
Treatment — "Hypocloric
 and Nutritive" — Bleed if the
 patient need it — cut the hair
 of the head an hour or so
 water and Rub the feet in
 warm water — The Antimonial
 Emetic is of very great
 service if the tongue continues
 creamy Carry the horse to
 vomiting — Give doses
 of

Laxative emetic every two
hours - combine a dose
of calomel determination
of the head must be
reduced or the patients
must die - Some think
but you must feel you
way don't let your patient
stare to death - Use bark
early in these ~~years~~ cases
Change the bed every day
ventilate the room -
Sponge the patients to
keep down the heat
of the body -

Spotted fever. Here
we have the same

difficulty that we
 have in typhus
 patients. Sometimes die
 within 24 hours purplish
 spots occur. The treatment
 is the same as the other
 forms of Typhus and Typhoid
only more prompt

Gross Dec-15th Tuesday 1863
 Gunshot wounds -
 Shock it does not pass
 away for some days some
 times it depends on depression
 of the nerves It is generally
 cured by stimulation of
 an alkaline reaction

Hæmorrhage. The one is it
to be stoppt - tie the blood
vessel above and below
if it is a large vessel it
should be done as soon
as possible - if it is a small
vessel cold water will stop
it. Secondary hæmorrhage
occurs from one week to
eight - apply astringent
above the wound - it would
be well to plug the wound
with lint and close
if the bleeding is profuse
cut across to the artery
and tie it above and below
but it so happens that

we cannot find the
bleeding vessel

3^d to extract the ball
and all foreign substance
place the part in the
same position that it
was when it received
the injury and then
you can pass the probe
to the bottom of the
wound you can tell
when you touch it
by the sound having
found the bullet the next
thing is to remove it
this is done with the for-
ceps - The bullet must be
extracted as soon as possible
it acts as a foreign body

you would not search
for it in the brain
liver or spleen
let nature get rid of it
if it is in a joint remove
it If it is entirely in
the bone let it remain
Sometimes it is necessary
to use the trephine Splinters of
bone should be sedily removed
as always the patient
tremble and remove all
pieces of bone and
all foreign bodies
They will provoke violent
inflammation and death

Hospital Dec 16th Wednesday
 Solumm Surnus

Give them a good Emetic and
 warm bath - Magnesia with
 a little anodyne Opium to quiet
 if the fever is not high
 cup the back of the neck
 Stramonium Verida Digitalis
 sometimes you have to give
 Liars They are very nervous
 on the side where expectorant treatment
 the patients do get well
 you must treat patients according
 to the case - Stimulate gradually
 and give opium Give Stramonium
 Verida 4 drops every 3 hours
 opium eaters have the same
 symptoms - You will find
 it among women
 701

You should be very careful how
you administer opii or Laudanum
Treatment Don't withdraw it
at once you must do it
gradually or you will
have Menapachia or nervous
irritability Allow fresh air
Stimulents good diet
Nervonine is very good
The liver becomes congested
Give May apple in very small
doses in 6 or 8 grs with muscov.

Agnew D.C. 16th Wednesday
Indolent Ulcers cured by compr-
ession after the ulcer has healed
you must apply Starch
police and the following
prescription

95
Nervonine 10 grs
Starch 10 grs
Police 10 grs

Nitric acid ~~27~~ 40 drops ⁹⁵
Simple Linctus $\mathcal{Z}ii$

to be applied to the skin
to change the character of
the circulation —

2nd case. Ulcer on the
ankle use bromine
work it into all the
parts of the sore — You
must peel off the everted
edge so that the bromine
can come in contact
with living tissue

1 part of bromine to 13 parts
water — Gentle cathartics
Go diet warm water
dressing

3 Cases Sore Eyes following the
excessive use of liquor - regulate
the habits - Treatment direct the
patient not forcibly to force
open the lids soak them in
warm water - ointment

4 grams of precipitate
some Seicate and a
little finely powdered
rubbed on the lids 2 or 3
times a day - regulate
the bowels - Citreus ointment
is very good - Mercurial
ointment -

4 Cases The man fell down
stairs Dec 13 - He has a very
bad ^{short} cough - pain in the
side

97

feels something grating together
systems of fractured ribs
The ribs are fractured The
9 and 10 require a roller or
adhesive strips - The strips
should always run obliquely
strips about 2 in broad it is
necessary to control the
cough Give anodynes
every day a $\frac{1}{4}$ gr. of Morphia
5th Case Syphilis Secondary
affection Crozier's Sublime
1 gr in 3 ounces of Sassafras
Dose 1 tablespoon full 3 times
a day at night Dover's powder
 $2\frac{1}{2}$ Roskell Salts
1 gr. triter emetic for
pluric

Cross Case Dec. 16th 1863

1st Case - Young Woman 25 years
blind in one eye caused by
inflammation of the eye Happened
when she was 6 years old

2nd Case - (a Nigger) 8 one Eye
Received a blow on the top
of his head 3 years old ago
feels dizzy in his head - numbness
in the scalp - Disposition to fall
forwards - The only thing that
we can do is to get rid of the
existing Inflammation

Mine of Colchicum

1 Spoon full

Sulf of Morphine
wash the forehead with lemon
water with a little salt

3^d Case - Affection of the bladder
 Ectropy of the bladder
 a hernia in each groin
 For ulcers and felling
 apply cocate of lead
 and opii - Internally
 mercury and opii - The best
 remedy is to cut them to
 the bone in felling

Conjunctal Hypertrichia
 of the tongue gives umbra
 Today The 16th Dec. Wednesday
 Next Case Hair lip -
 Direct the lips up and pain
 the edges then detach the
 lip from the gums - Introduce
 a pin at the lower extremity

and then can often higher
up - The child should be
two months old - cut the
lips with a pair of scissors
be careful to get the lower
edges even, leave the pins
in from 3 to 4 days
leave foot cut off the muscle
that holds and put on
the apparatus to straighten
them. 
Waller Dec. 16th Wednesday
On Perine They should
be made of flexible rubber
Some women can wear
any pessary at all on
the account of the tendency
of the vagina

Sometimes the only thing
that a woman can bear
is a piece of sponge
~~Sash~~ ~~Slush~~ is a little
cotton bag filled with
Tannin or powdered
vase ~~cast~~ - don't put
it in if you can help it
don't leave them in any
longer than you can
help Sometimes Dry men
women have swelling of
the uterus by the blad-
der not being emptied
they can't pass their
water or they are pass-
ing water all the
time A comes by a
sudden jar, or falling

on the back Symp
are a thing of the
back The first
treatment

Gives - Dec, 17th ¹⁸⁶⁴ ^{Canada} ^{Army}
Gives 17 wounds continued
Sometimes you must enlarge
the wound and examine it
in order to get rid of loose
pieces of bone - This may
be done by the fingers
with the aid of forceps
you may inject cold
water to wash out small
pieces of bone cut
off the sharp points of

off the sharp points

Bone or they will
be irritating the muscles
and blood vessels —
Then place the parts
in a relaxed position
a little elevated — Then
use cold water dressing
medicated with a
little opium don't apply
any thing to the wound
like lint you may
apply a roller to support
the parts taking care that
you do not close the
wound so that it cannot
discharge — Cold water
is the greatest remedy
it is not to be used
all times 46

But if the patient has
been shocked or diseased
previous to the wound
Then use warm water
or poultices - at the
beginning of the disease
Cold water afterwards
warm medicated with
alcohol - acetate of
lead opii -

Constitutional Treatment
It should be antiphlog-
istic or if he has lost
blood milk punch nutri-
tious diet - for wound
fever you give Morphia
Tartrate of Antimony

we give it off or to
 produce sleep, and
 to relieve pain if he
 is worn. Spruce the
 body with cold water
 if cold use warm water
 we dilate the wound
 if there is supuration
 and no discharge
 you give the patient
 Morphine. Iodine in
 combination with
 nutritious diet
 Gun shot wounds in
 different parts of the
 body - of the lower
 extremities - Amputation

Primary Amputation
is amputating at the
time of the injury —
Secondary Amputation
is amputating some
4 or 6 days after the wound
You should amputate
in a healthy part
of the limb — when
the patient is in a
low state you must
bring up the patient
before the you operate
you must not wait
until there is suppuration
Always administer Chloroform
is a good stimulant

What are the Cases
 that demand amputation
 Suppose the humerus bone
 blood vessels and all are
 injured you would amputate
 immediately - ~~but~~ if the bone
 is whole and one of the
 large veins or artery
 or and principle nerve are
 injured you will amputate
 but there are exceptions
 to all rules - if a large
 joint is lacerated from
 amputation or your
 patient will perish
 from pyemia typhoid
 or dysenteria

I have continued
you cannot amputate
for injury of the hip
joint.

Dickson Dec. 18th Friday
Catarrhal fever
with a large dose of
Opium we cure about
this fever - You must
guard your patient
for a few days -
The loss of a few ounces
of blood is very good
give an emetic and
a cathartic - Warm
mustard poultice, and
warm applications
Strong infusion of

bark's Peliculation by
 mania to blister
 the back of the neck
 mustard to the feet. Calves
 of the leg. Under the arm
~~of the~~ ~~of the~~ ~~of the~~ ~~of the~~
 of joint. Kneading
 the throat is one of the
 by nature. The disease
 commences with chills
 generally dullness
 Dull obtundement in
 the breast. Dullness
 in pronunciation
 Sometimes Diarrhea
 Pruritus of the bladder
 You always find
 plastic lymph in the

Boats of the heart
and lungs and pleura
from Gowers powder is
Bismuth to calcium
pale - Carbonate
of Ammonia and wine
has been used as stim-
ulants. Poter Nervative
acid Arsinic as a tonic

Gross - Dec. 13 Friday 1863
The opening of entrance
of a ball is much
smaller than the opening

of exit -

Heamorrhage or wounded
arteries - They are ^{horizontal}
oblique longitudinal
They contract The blood
condenses with an
external clot and inter-
nal clot as the vessel
heals the clots are absorbed
and a closure of the
artery by its coats

It is much safer when
the artery is cut entirely
off than when it is
wounded The ligatures
come out by ulceration i.e.
off from arteries sometimes
it ~~is~~ is detached in
~~the~~ two or 3 days in the
smaller & arteries

in the larger arteries
it may be ten or 12 days
if they do not come loose
take hold of them and
make a little picture
compression Tannic
or compression. Sometimes
a wound may be plugged
with cold water
and cold air per Sul-
phate of Iron
per chloride of Iron Alum
Creosote Sulphate of
Copper

Wallace Dec 18th yesterday
on Obstetrics
- 58

Retroversion of the pregnant
 uterus Interference
 with the Maternal and
 foetal process within the
 pelvis. What would
 become of the uterus
 The first thing to be done
 is to examine her and
 put it back which is
 hard to do. The first thing
 to do is to empty the bladder
 which is sometimes very
 difficult. put your finger
 in up around the pubic
 arch and push the uterus
 back and pass the catheter
 up along the finger

Then put your patient
on her hands and knees
then you unload the
uterus of its weights
then pass in two fingers
into the vagina and
press it up cautiously.
And put one finger in
the vagina and get
your finger into the os
interi^{or} and draw it down.
Having replaced it
put the patient to
bed and keep her there
for a week or two —
but if you cannot
replace it then you

will have to produce
abortion - Next
Inversion of the
uterus - What is the
Cause it generally comes
on just after labor but
it may come on anytime
Caused by a Spasmodic
Caused by irregular
contraction

Hospital London Dec 17th Saturday
Fracture of vertebra
Counter indication for ope-
on to the limbs and
Nervous - has a stinging
sensation the spine to
be rubbed with stramonium
oil externally and
Stramonium internally

It comes by a fall
on the butthick—

Carefully examine the
spinal column—creeps
and leaches along the
spine—Take a towel
and dip it salt and
water and let it dry
and rub the parts with
it—a small weak blister
Then rub in a little

Stramonium ointment—
Be careful about heat
sores use (crocodubbin
and Calabar for heat sores)
Take a plant and cut
a hole into for the sore

117
to rest in) tell your
patient how it is tell
them that time must
do more than the Dock.
The nerves of motion are
injured in these cases
I would case - Kalmann
also some pain over
the region of the heart
had him cup over the
heart. The heart is very
liable to be affected keep
down the action of the heart
with Scitram verivra in 4
drop doses - Bleed in some
cases when the pulse is high
very low
very low
very low

good when there is syphi-
tic taint. If it is in the

8 22

Then apply a small
 blister to the part and
 then keep it open with
 Blisters - make a
 liniment of gorse grass
 lead and oil camphor
 Anonima and rub
 with it lotion gorse
 grass and lye oil and
 let the patient wear it
 then keep the patient
 in action -

St Agnew D.C. 17th Dec, Saturday
 1st Case - An anteroposterior
 Curve of the spine

Two causes 1st Psoas
 is affected or Scrophulous
 disorder it is called
 Psoas disease 2nd The spine

Treatment is symptomatic
practice which is very
essential in the very
early part of the disease
you may apply blisters
and leeches

Constitutional remedies
nutritious diet
cod liver oil Iodine
and a little Iron
I saw a woman with a
tumor - Chronic abscess
Caused by a fall
Treatment consists in
making an incision
afterwards inject a
weak solution of
- 16

Nitrate of Silver

3d Case - Sore Eyes

Puff Swell know what
is the diagnosis

4th Case - Sore Throat

The Tonsils are very much
enlarged you can relieve
the difficulty by Scarifica-
tion and then apply soothing
and if very bad cut
them off -

Case - 5th Conjunctivitis

fell on a corn stalk
and put one eye out
the other sympathizes

Apply Nitrate of Silver
Eight grs. to the ounce
counter irritation by a blister
on the temple

Wallace, Cal. 19th Dec Saturday
1892 Case Corria
Suffering of an acute twitching
of the arm - a young
woman - Active friction
on the surface and
tonic - Fowler's solu-
tion 15 drops M A & Night
in a little water - a salt
bath friction all over
the body

Feb 1 May vomice 20 gr
Divid into 20 pills
1 Morn. Noon and night
if it disturbs stop a
few days and begin
again

2nd Case pain in
the left side pain in
the back Scurvica
Abundantly poor apete
te been so since her
last delivery

3rd Case - Bleeding of the lungs
Sound of the lungs more
distinctly than it should
The nails rounded
the upper portion of the
lungs are very much
diseased night sweats
had a hemorrhage and
then he felt better - Cough
was better had hectic fever
The hemorrhag breaks up
The hectic fever has a
great deal of mucus in
the lungs

Give a moderate amount
of Opium to stop the cough
good diet active exercise
Brandy or Whiskey
Et Hui Cumaros 30 grs
pulv Opium 6 grs
M. Sulfate 1/2 grs Direct
1 M - N - And Night

4th Case Tesis

Has a bad cough in the
morning when he gets up
takes a large drop for the
cough - The sound seems
as if it was right in
the lung Whiskey or
brandy - 1/2

tion E. A. J. J. J.
1867 Dec 19

The tumors of the uterus
 are of two kinds
 we call them fibrous
 or fatty which are
 sometimes weight
 bearing down pains
 back ache swelling
 of the legs. You please
 to be examined
 The Menstrual
 may not be altered
 but they are generally
 irregular. They may
 become profuse
 Treatment You can't
 do anything but
 support the system
 temporary support

1863

1864

Selfish intercourse

make them grow
the sexual appetite
is increased (—) (—)

Dickson 21st Dec, Monday

On the circulation of
the blood - The heart is
about the size of the man's
fist weighs about 9 ounces

The heart has two sounds
the first is longer and
dull the second is short
and sharp Heart disease

There is uneasy feeling about
the region of the heart
feels faint when going
up stairs the tongue
has a dark color

You find Heart Disease
connected with Pleura
and Rheumatism

There is Dull pain about
the region of the heart
violent beating of the
heart cough heat of
skin head ache thirst
Nausea delirium The
patient does not like
to lay down flat
wants the head raised
Pericarditis is more
easily diagnosed
Generally connected
with Rheumatism

Pericarditis usually shows
itself by sharp pain

by examining by auscultation you will hear a rough S-s-s-s-s generally but a short time - and then the S-s-s-s-s of the heart becomes very dull this owing to effusion in the heart - the patient does not want to lie down a little he is coughing the rough sound may return which is favorable - There is some edema the patient cannot ascend a flight

Ende ende to give

you a clear sound
 the patient complains
 of heavy pain less
 even less consciousness
 of the substance of
 the heart is diseased
 you may have emphy-
 sion of the heart
 The heart has been
 found full with pus
 looks black you
 will find it covered
 with a cinous mem-
 brane sometimes
 you will find little
 warts on the valves
 sometimes they become
 adherent and thereby
 stop the circulation

The treatment of
all these diseases
are the same. The
Lancet has been
used in all these cases
as I think it is very
essential I would
repeat if the same
system was used.
Antiseptics are
much in use verbatim
verbo. Look the origin
of the host counter
indication reduce
the diet very much
for the first few days

Grise 21 Dec - Monday
 Amputation in gun
 shot wounds - we should
 amputate some ways
 from the injury or
 the inflammation
 will be very severe
 gunshot and other wounds
 of the scalp where the
 wound is large shave
 the hair off and apply
 the Suture they are
 apt to be followed by
 more or less disturbance
 of the brain neuralgia

1863

1863

K

Walter 21st Sunday
Polypus of the uterus
Polypus Tumors are but
slightly vascular
Bleeding from the womb
is one of the symptoms of
Polypus have just as much
hemorrhage from a small
one as a large one -
The uterus grows as the
Polypus grows

Symptoms Leucorrhoea
Haemorrhage You must
make an examination
Sometimes the blood
retained in the uterus
is -

Transect Away with
the Disease You may
have to keep your
patient up with good
diet strong astringent
injections of Alum
Opri or plug up the
vagina to stop the
blood and wait a-
while untill you
can get to it then
take your Scissors
and cut it off as
close as you can
if there is any left
it will shrink away
If there is any humor
have you must touch
it with lignor castic

or you can apply
a ligature to the polypus
they are very soft which
arrests the circulation
if it get nasty you
can take a syringe
it out - you will have
to catheterize your patient
after the tumor is
off wash the part
with water metaca
tid chloride of Soda
or a little Soap
if your final one in
labor put a ligature
on and draw it as
tight as you can

139
and cut it off
leave the ligation on
or take an ecraseur
and crush it off and
you will have no
hemorrhage

Golly flower ex cressum
Springing from the
or uteri. Sometimes
they grow very rapidly
Sometimes very slowly
it is a largely vacu-
lar body with small
blood vessels

1863-1863-1863

1863

Given 22nd Dec Tuesday.
Injuries of the Scalp
and Brain - Triapison

Wallace Cl. 23rd Dec. Wednesday
1st Case - ~~Disorder~~ Has a
tendency to vomiting - - -

He has a lump in the
abdomen. We think it
is disease of the pancreas
which will run into cancer
Almost everything he
eats distresses him

All you can do is to
palpate the condition
of his bowels should
be looked after. Give
purgative to wake up the
stomach or Rheumatic Colic

Sub-nitrate of Bismuth
 Give a small amount
 of concentrated food, you
 can apply cups Blister
 to palliate the Disease

For Asthma

Rh. Syphilis

• Spinaemia

Treat with Air Bgs. 30th day

Use Croton Oil on

the Surface

Wallace, 23rd Dec. Wednesday

Colly Flown excrement

in uterine - or vagina

Disease Treatment -

Remove it by the Knife

or the Ligature having

removed it & bring

your cystic down
upon it - Ostia

Polysaccharide or Acid
Nitrate of Mercury
and Lunar Cystic
good Supporting
diet Potassium the
Vermica Chloride of
Iron -

Tumors of the Uterus
Cystic Tumors - But
you may have Solid
or Solid and Cystic
We find them at all
ages The great majority
these tumors are Cystic
The surface is smooth

If you tap them
 you may have hemorrhage
 you may have transfused
 a large vein —

Adhesions will exist
 between the cyst and
 the peritoneal contents.
 They sometimes
 contain hair bones
 and fat.

hemorrhage from
the nose

LP

Gross. 28th Dec. Monday

Brought in a little Nigger
boy.

on dislocation of the lower
jaws The lower jaw is
thrown forward also
a cavity in front of
the difficulty of articulation
and mastication.

Treatment The Thumbs
are introduced into
the mouth and the
fingers below make a
fulcrum of the Thumbs.

The jaw should be band
aged for 4 or 5 weeks to
let the ligaments heal.

Dislocation of the Uterus
from the patient generally
dies immediately

Dislocation of the Clavicle
Wallace 28th Dec. Monday.
Ovarian Tumors

The Mucous may or
may not exist -

Pregnancy may take
place and go on to
full term but it can-
not be born then you
must resort to Craniotomy
Sometimes they are
absorbed

Diagnosis Pass the
Sound into the
5 17

uterus if no
147

uterus if you find
there is a tumor
outside of the uterus
it may be the tumor
she has the symptoms
of pregnancy

Sometimes they run
on to a termination
Sometimes they last
for fifty years
treat the stomach well
with sweet oil and
turpentine but use
opiates, look to the general
constitution of the
bowels

1863 Philadelphia

Dec 29th Tuesday
Remembrance from the Large
Treatment Table Salt
Opus. Antimonials
sometimes the same
so the best remedy
when the pulse is hard
and face flushed -
very few die from the
first attack The Eng. did
use Mercurials I never
saw any good from it -
Veratrum viridae -

Nitrate of Potash
with Dovers powder
/Riasote

open the bowels
give the patient nour-
ishing food - counter
irritants -

Warm poultice with
a little mustard after
wards a large Blister
over the part
watch the cough with
great care.

Bleeding from the
Stomach - feels as if
needles were running
in the Stomach

vomits up the blood
feels sick at Stomach

Diallagon Continued

It is not generally
fatal

Treatment Tannin with
Brandy Bleed if the
pulse is hard

External irritation
acetate of lead 5-10
or 20 grs -

Per sulphate of Iron
Muriated Tine of Iron
with Bore -

You will almost
always find some
disorder of the Stomach
Hemorrhage from
the urinary bladder
If the pain is in the
-st-

lumber region it
 is from the Kidneys
 If in the Pelvis it is
 from the Bladder

Treatment Sit the
 Patient into a tub
 of cold water

Cold or warm applica-
 tion according to the
 feelings of the Patient

Hospital

Yellow 35th Dec ^{day} Wednesday
 1st Patient Good tongue
 very weak pulse

headache pain in the
 side - has Bronchitis
 has a kind of Hysteria
 gave her asafetida
 in 1852. Doses every 2
 hours

Generally coming from
disease of the urinary
organs - Ophry. Scurra
coatic to the heat of
the uterus if there is
irritation of the uterus
Asafoetida in combina-
tion with Opium for
nervous irritation of
females take them
away from all exciti-
ing causes.

Relinicate of Zinc
or black snake root
Simicafuga

Murex vomica & Stramonium
to wake up the morbid
system.

After you have produced the effect give another -

Surgeon General -
1st Case - Cancer of the face now gone some of the lips - 7th 12 years old Treatment but on a little castor oil and constitutional treatment it cannot be cured -

2nd Case - a man who was wounded at the battle of Cedar Mountain Compound fracture of the leg below the knee

The wound has never
healed - There is necrosis
of the bone

3^d Case - Enlargement
in front of the Thyroid
cartilage - It is a boil
Treatment - Open it and
apply warm water
dressing a few thick
masses of muslin
wringing out of warm
water with oil silk
over it fastened with
adhesive plaster

4th Case - Black woman
with a cataract in
her eye

5th Case - old man
with Stricture of
the Urethra

Treatment Division
Dilatation

If there is pain after
the operation place
the patient in a semi-
bent position and
dovers powder in 10 or
12 gr. Doses -

Kallie - Dec 20th Med.
Epilepsy ^{fits} in a little
girl living in the
thorax. Throws up
her food - Can't express
any opinion - Bad case

Hydrocile in the
Scrotum

Make an incision
about one inch long
and take a mop and
saturate it with equal
parts of alcohol and
Iodine

Enlargement of the
Testis. Moving when
a sleep head turned
back - and profuse
sweating when asleep
you must excise

them. The patient should
be kept in a room
washed out with a
little tepid water & vinegar

2nd Fibr. curious Drops
It is very difficult to
decide between diphtheria
and Inflammation
The urine is scanty
and high colored
There is Albumen in
the urine the Stomach
is irritated by its own
contents There is swelling
of the feet

Today is a sunny
day

LE

(Monday) 157

Wallace Mrs. L. L. to
Menstrualgia to progress
flow of the menses
Sexual excess often
produces it The causes
are various - Examine
the cause first -

first Keep your patient
still - you will have
excited pulse - Take down
the pulse first -

Exet and Tinct of
Chloride of Iron -

If it come on when
the flow does you can
apply cold to the pelvis
Dry cups all around
the pelvis are very good

* Excess of the or Excess of the the cause of the Hypertrophy

If it depend on uterine
irritation - you must
treat it by rest and
apply cups or leeches
If it is dependant on
to excess of Sexual excite-
ment Stop the excess. -

If the man is to come
brunais - give him
Lactar acetica and
water 2 grs. to the ounce
If there is ulceration
of the cervix uteri you
must apply caustic
to the parts

Chlorosis

159

Symptoms greenish
tinge of the face
brown around
the eyes Disordered
Respiration to frequent
palpitation of the heart
Dull pain about
the chest - Depressed
appetite pain about
the abdominal disor-
der of the kidneys - flatulence
Diarrhoeal pain in the
limbs feet swell
face swelled in the
morning Cornea will
set in sometimes
Strange will be the
Sight of a Sore

you must look
after the uterus and
America give plenty
of Iron good exercise
plenty of fresh air
gentle stimulation
Animal diet
In diarrhea put in
a little opium and
caphor - Aloes oil Tamey
and Iron - action
friction on the
surface with salt
towel

Dickson Jan 5th 1864 Tuesday

Dropsy It is hard to
remove the cause
you can remove the fluid

88
You can remove the fluid

quite easily

The whole treatment
of dropsy is indirect
after drawing off the
fluid you must stop
its reforming if you
give cathartics your
patient will die soon
from the drain you
then apply you must
stop its forming -

The lancet is very good
Blisters also opium
at times act as diuretic
Digitalis if adapted
to the case is good
Regard the condition
of your patient and
treat accordingly
66

Dilatation

Legnum in from
40 to 40 of grain every from
Removal of Jacta is very
good - Gamboge
given in Solution with
Nitric Ether

Nitrate of Potash

Insipiente Grampen berries
Cantharidies

{ You must give water
on diet -

Peppermint tea is very
good to act on the
Kidneys

Diuretics act better
when combined

You must be careful
not to continue to

not to continue to

cong-

Colchicum combined
with Syphilis is very
good where there is gout
or Rheumatism with
dropsy - Make incision
with a lancet -

Chol - Lamination of

Cholera to the bowels &

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Cholera in the bowels

Make a grate many
punctures on the sole
of the foot and ankle

How shall we prevent
the return of the flux
give the patient fresh
air exercise give
iron and bark - The
infusion of Symplocos
is very good Make with
Potash

Mercurials have been
very much used
against the belly with
Digitalis -

Aschetic you have
to distinguish it from
(56)

pregnancy be very
 careful in diagnosis
 you will find the
 mounting glands enlarged
 the patient presents
 in the morning feels
 dizzy has headache
 the urine is scant
 and high colored
 examine carefully into
 the history of the patient
 previous to the complaint
 you will find the
 liver affected

1864 " 1864 " 1864 " 1864 "

January

Siechen Jan 7 & 11/2 Tuesday

Schick You will have

visceral disorder sooner

or later - Mercurials are

well known in dropsy - If you

do employ them do it carefully

If the Mercurial fever be

produced stop the Mercury

you should always have

your finger on the pulse while

the water is flowing and if

the pulse falls stop the flow

The operation is generally

well borne - You can use

stimulating fluids may

be injected in a catheter

or otherwise

(L 7)

Hydrothorax
Hydrocephalus or dropsy
 of the chest - It is the result
 of Pleuritic disease - or cardiac
 disease you will be expected
 to make correct diagnosis
 you must change the position
 of the patient and percuss
 and auscultate and you
 can tell if you are careful
 you will find that the
 affected side does not
 rise and fall in respira-
 tion as the other side
 There is a stertorous condi-
 tion - the patient suffers
 on going to sleep - The
 patient hants on the least
 exertion the urine is high colored

Irregular pulse - palpitation
of the heart Sometimes the heart
is out of its place, pushed
by the fluid -

Treatment - Diuretics are
the prominent treatment
In many cases you will
find benefit from musca-
ry - Tobacco - Cream of
Tartar - In some cases the
Cantharid is very good you
must judge by the consti-
tution Opium must be
freely used - Blister
should be applied
extensively to the chest
The Thorax may be
(S.T.)

opened and draw
off the fluid.

Hydrocephalus

Fluid in

the Brain

Gross Low Water: Low water

Treatment of fracture

1st Set the fracture by
extension and counter
extension and malrotation

The extension should
be made in the direction
of the injury or length
of the bone be careful
and do it moderately
If the fracture is of the
inferior extremity
the patient must be
confined to bed

For a band
of Boote & Band
Boote board is very
good for fracture
of the jaw or arms
but it should be put
into Boiling water
to soften it and then
mold it to suit the part
you must commence the
roll at the end of the
limb you must make
allowance for swelling
apply it loosely if it
gets too tight that
any place you must
remove it use the
sissors to slacken it
sometimes the bandage
is wet in wet weather

in use of the water

171

After we have got
the ends of the bones
together we endeavor
to keep them there
The dressing should
not be removed - Visit
your patient often -
During the first few
days the patient will
have fever these must
be attended to give
antimonials
attended to the urine
the diet must attended
to - After a few days
you must make passive
motion to keep ankylosis
from the joint

When you take off
the dressing you must
wash the part with
carbolic soap and
bathed in Camphor
Complicated fracture
is one where there is a
wound of the soft part
Should there be a Dislocation
reduce the dislocation
first and then set the
fracture Should a joint
be laid open or the
main artery torn off
you should be amputated
Sometimes the bones will not
unite with the best treatment
D.T.

or it is not solid
then you may break
it again

Individual fractures
fracture of the nose

They may be simple
or they may be complicated
Deformity is not always
pleasant. Introduce
a female Batheter into
the nose and elevate
the fragments and
make them hold their
place and apply adhesive
strips across if the hemor-
rhage does not stop you
must plug the nose

1 - 1862

if the water bone be
broken you should if you
cannot get it back in
any other way cut down
upon it and uploose it
by making levers to
raise it -

The lower jaw is liable
to be broken at different
parts.

Mitchell says 85/55
Magnesia. Holly hawk
substitute for gun. Robin
Mongoose - Arrowroot -
Mastic May Apple
Potash pulverised
May Apple substitute
for calomel 51

Mint. Pepper mint for
colic in young
children taken inwardly
and made a poultice
and put on the Stomach
a drop in an ounce
of Sweet oil and rub
it along the spine
of an Infant will
cure colic It will
put it to sleep -

Mills - Monesia

Eggnacia Maria $\frac{1}{5}$ gr.

in pill 3 times a day

Coat liver oil a Table

Soonful 8 times a day

and blister

X. Dickerson 8th 1804 -

Hydrocephalus

cold to the head

Mercury -

Purgatives -

Cross-Jaw, 8th 1864 Friday
In fractures you must
subdue Inflammation
and see to the bladder.
The lower jaw may
be fractured at different
parts. The symptoms
will vary according to
the injury - there will
be more or less deformi-
ty - Care should be taken
to keep the jaw in close
contact with the upper
or they may be held
together by silver wire
around the teeth
or by a ^{cast bronze} (binet's band)
splint. (St)

Fracture of the Humerus
Bone is occasionally
met with -

Fracture of the Cervical
The fracture is generally
oblique - The symptoms
are characteristic - The patient
grasps the arm at the
elbow and holds the
body at one side
The Shoulder is sunk
downwards and inwards
The patient is generally
unable to raise his
hand to his mouth
The fracture is adjusted
by pushing the Shoulder
upwards outward and
backwards (71)

The arm should be
flexed so that the hand
is on the Coracoclavicular
and then secure it by
adhesive Strips

You must not remove
the dressing more than
once generally. It is
not necessary to intro-
duce a cushion into
the axilla =

In spite of all you can
do there will be more or
less deformity

Fracture of the Sternum
also fracture of ribs
There may be or may
not be Displacement

The patient will

have trouble in
breathing

181

You must apply a
compress and confine
it by adhesive strips
they must extend once
and a half around
the chest or a roller
you must not pay any
attention to the air in
the pleura it will be
absorbed.

(61)

Fracture of the Scapula

Wallace Jan. 8th 1882
Corruption

A gush of Blood may
wash away the ovine
fecundation may
take place in the fallo-
pian tube or in the
uterus. It is not found
in the uterus until
about 12 days.

Compulsive ovulation
is brought on by
Sexual temptation

Conception is not
pregnancy.

(11)

Pregnancy is the development of the ovum where may conception take place -

Pregnancy may take place in the ovary or in the fallopian tube. True pregnancy is where the ovum has fixed itself inside of the uterus.

The child is not the cause only of the enlargement of the womb. You will find one end of the womb higher up than the other.

OT (OT)

The neck of the uterus
is not more than an
inch and a half two
weeks prior to ~~the~~ labor
You will find the
pregnant uterus
retroverted

You will find
it tilted a little
to the right
at the end of
three months and
a half the uterus
is out of the pelvis
you can feel it
at the top of the
pubis (b)

by the 5th month
it will be up to
the navel.

It continues to grow
untill about 8th ~~month~~
months and then
it appears to get
smaller it sinks
down

Why does it fall
It jams the fetus
down into the
excavation of the
pelvis - Sometimes
it flattens out
transversely
It is a sign that

She will be pregnant
in 12 or 14 days -
But it does not
always suit
some women
carry the child
high but it is
not a general rule
